

# TETRA Interoperability Certificate

## Trunked Mode Operation

**Airbus Defence & Space, TETRA System Rel7.0, SwMI –  
Motorola Solutions, MTM800FuG, Terminal**

Berlin, February 2019

Latest Certified SwMI SW Release:	Rel7.0	Latest Certified Terminal SW Release:	MT953CG
Latest Certified SwMI HW Release:	M98F(DXTip)	Latest Certified Terminal HW Release:	MR17.3

ISCTI (Istituto Superiore delle Comunicazioni e delle Tecnologie dell'Informazione) certifies, that the Airbus Defence & Space, TETRA System Rel7.0, SwMI and the Motorola Solutions, MTM800FuG, terminal have been subject to interoperability testing for the “certified” features listed on second page of this certificate, in accordance with the TETRA Interoperability Profiles, TIP compliance Test Plan and related TETRA interoperability requirement tables.

The table lists all the available TETRA interoperability profiles, and summarizes the main functionalities of every profile according to the TETRA interoperability requirement tables.

A feature is “Certified” when it has been successfully tested during the last test session with one of the testing method described in the TETRA process document part 1 (TPD001-01).

A breakdown into the feature details is given in the Feature Compliance Overview section of this certificate.

This certificate has been issued following a fully witnessed single test session between Airbus Defence & Space and Motorola Solutions on February 2019. Detailed test results are listed in the Test Report associated to this Certificate. Details and explanation about the procedure used to provide verdicts are in the TIC process TPD001-01.

<b>Simple Callout</b>	Certified
<b>Interaction with other services and events</b>	Certified
<b>Callout Test and Callout Availability</b>	Certified
<b>Callout Text and Callout Pre-Coded Status</b>	Certified
<b>Storage of Callout Information</b>	Certified
<b>Graceful Service Degradation Mode (GSDM)</b>	-

## Feature Compliance Overview

The first pages of this certificate provide an indication about the main interoperable TETRA features for each TIP specification (as described in the TIC-RT). The main interoperable TETRA features' results depend on a set of sub-features, the verdicts associated to each sub-feature are directly derived from the analysis of the performed test cases.

The results associated to each feature and sub-feature are shown in the "Feature Compliance Report" table below. The main features are indicated with blue background and the associated sub-features (or second level features) have a white background.

The outcome assigned to a feature as shown on page 2, is derived by the Feature Compliance Report tables.

Outcome	Definition
<b>Certified</b>	All required tests have been performed and passed
<b>Partial</b>	Not all the required tests have been performed but none have failed
-	Feature cannot be certified e.g. it is not supported by at least one product, no tests were performed, or some tests were performed but at least one failed

The outcome is derived from the verdict assigned to a sub feature which is the result of an analysis of the test case results listed in the Test Report. The verdict assigned to each sub-feature is derived from one or several test case results or test steps result, the TETRA Interoperability requirement tables (TIC-RTs) indicate the link between sub-features and test cases for the certified set of equipment capabilities (see Test Report).

Verdict	Definition
<b>Passed</b>	All mandated tests or steps of tests linked to this functionality (as per TIC-RT indication) are compliant with the TIP specification relevant to this feature or sub-feature
<b>Incomplete</b>	Not all Mandated tests (as per TIC-RT indication) have been executed
<b>Failed</b>	At least one of mandated test or steps of tests linked to this functionality failed to match the TIP specification relevant to this feature or sub-feature

The verdict associated to the feature or sub-feature gives also indication about the method used to

test that feature or sub-feature. The allowed testing Methods are listed in the table below, a complete description of the procedures and constraints associated to each of them can be found in the "TPD001-01 TETRA Interoperability Certification Process Description" document.

Testing Method	Description
<b>Complete</b>	All mandated tests associated to the feature or sub-feature have been executed
<b>Spot</b>	Only a selection of the mandatory test cases associated to the feature or sub-feature has been executed during the test session. These tests are a subset of the tests performed on an equivalent software which has been "completely" tested against the same functionality on a different equipment, see manufacturer declaration in the associated Test Report
<b>Regression</b>	Only a selection of the mandatory test cases associated to the feature or sub-feature has been executed during the test session. These tests are a subset of the tests performed on a previous version of the same software which has been "completely" tested in a previous test session against the same functionality, see manufacturer definition in the associated Test Report
<b>Regression on spot</b>	The regression method (see the previous item) has been applied at this session on the verdicts from the referenced (previous) session where the spot testing method (see above) had been applied.
<b>Witnessed</b>	The TIP heading lines in the Feature Compliance Report indicate whether each TIP is partially or fully witnessed by the Certification Body. Additionally, for a partially-witnessed TIP, the number of witnessed test cases that passed is shown for each the feature and sub-feature. There may have been some un-witnessed passed tests and they will have been found to be successful based on the log file evaluation

Depending on equipment capabilities declared by the manufacturer, some features or sub features cannot be tested. The following table describes meaning of the used abbreviation:

Indication	Definition
<b>Not supported</b>	The SwMI and/or MS do not support the minimum features required to verify these items

ISCTI has made every effort to ensure that every result has been correctly evaluated in accordance

with the relevant TIPs, Test Plans and TIC-RTs. ISCTI has no liability for the test results, or towards the manufacturers.

The table on the following page lists HW and SW releases of SwMI and Terminal under test in the last four test sessions and the used TIP specifications, Test Plans and TIC-RTs.

This Certificate and Certificates from previous test sessions are available on the TCCA web site (<https://tandcca.com/interoperability/interoperability-certificates-and-test-reports/>).

The feature results are shown in the tables below.

### Information on equipment under test and document references

Test Session Date/Place	<b>Airbus Defence &amp; Space, Berlin, February 2019</b>			
SwMI Type	TETRA System Rel7.0			
SwMI HW Release	M98F(DXTip)			
SwMI SW Release	Rel7.0			
Terminal Type	MTM800FuG			
Terminal HW Release	MR17.3			
Terminal SW Release	MT953CG			
TIP Specs and TIP Compliance Test Plans				
Callout	TTR001-21 v2.1.1 IOP001-21 v2.3.0 TIC-RT001-21 v115			

## Feature compliance report

Test Session	Airbus Defence & Space Berlin February 2019			
<b>Callout - Fully Witnessed Testing</b>				
Full Callout				
Individually Addressed Full Callout with request for Terminal Receipt message and with request for User Receipt message	Not Supported			
Group Addressed Full Callout without request for Terminal Receipt message and without request for User Receipt message	Not Supported			
Using current selected group during Full Callout	Not Supported			
Full Callout with immediate change to Callout Group	Not Supported			
Full Callout with change to Callout Group on non-rejecting user response	Not Supported			
Full Callout with rejecting User Receipt message	Not Supported			
Full Callout with timeout for User Receipt message	Not Supported			

Callout Incident Information messages	Not Supported			
Group Call to Callout Group	Not Supported			
End of Full Callout	Not Supported			
Simple Callout	PASSED Complete 6_pass_of_6			
Individually Addressed Callout with request for Terminal Receipt message and with request for User Receipt message	PASSED Complete 1_pass_of_1			
Individually Addressed Callout with request for Terminal Receipt message and without request for User Receipt message	PASSED Complete 1_pass_of_1			
Group Addressed Callout without request for Terminal Receipt message and without request for User Receipt message	PASSED Complete 1_pass_of_1			
Group Addressed Callout without request for Terminal Receipt message and with request for User Receipt message	PASSED Complete 1_pass_of_1			
Simple Callout with rejecting User Receipt message	PASSED Complete 1_pass_of_1			
Simple Callout with timeout for User Receipt message	PASSED Complete 1_pass_of_1			
Interaction with other services and events	PASSED Complete 29_pass_of_29			

Interaction with previous Callout	PASSED Complete 1_pass_of_1			
Interaction with emergency call	PASSED Complete 3_pass_of_3			
Interaction with non-emergency call	PASSED Complete 11_pass_of_11			
Interaction with data and status	PASSED Complete 13_pass_of_13			
Interaction with local services	Not Supported			
Manual exit	PASSED Complete 1_pass_of_1			
Callout Test and Callout Availability	PASSED Complete 4_pass_of_4			
Callout Test	PASSED Complete 2_pass_of_2			
Callout Availability	PASSED Complete 2_pass_of_2			
Callout Availability request	PASSED Complete 1_pass_of_1			
Callout Text and Callout Pre-Coded Status	PASSED Complete 13_pass_of_13			

Callout Text	PASSED Complete 5_pass_of_5			
Concatenated Callout Text using Callout Specific Concatenation	PASSED Complete 2_pass_of_2			
Concatenated Callout Text using mSDS	Not Supported			
Callout Pre-Coded Status	PASSED Complete 6_pass_of_6			
Storage of Callout Information	PASSED Complete 2_pass_of_2			
Viewing Callout information from previous Callout(s)	PASSED Complete 1_pass_of_1			
Deletion of Callout information from previous Callout(s)	PASSED Complete 1_pass_of_1			
Graceful Service Degradation Mode (GSDM)				
Graceful Service Degradation Mode (GSDM)	Not Supported
