Products
470pcs PT580H (UL913) Portable Radio

PT580H

Background >>

Salym Petroleum Development N.V. was established in 1996 as the joint venture of "Shell" group and Russian oil company "Evikhon" (which was bought by "Gazprom neft" at the end of 2000-th) for the development of Salym fields. The Salym project is the biggest oil field of in the world. The total volume of produced oil has exceeded 65 mln tons from the beginning of the Salym project implementation.

Customer's Problem >>

Salym Petroleum Development N.V. required the hand-held radios with fully-featured function in the existing radio communication system of TETRA standard and meeting with the explosion safety standards. What's more, it is a necessity of hand-held radios to be upgrade available considering the customers' budget.

Hytara Solution

Hytara together with partner Leo Telecom had provided 470pcs explosion-proof hand-held radios PT580H (UL913) for Salyem Petroleum Development N.V.

Advantages of Hytara solution

Explosion-proof hand-held radios TETRA PT580H (UL913) have been developed in accordance with UL913 and CSA (Canadian Standards Association) standards. Concerning explosion safety, they can be safely used in many increased danger areas such as oil industry companies. These radios will ensure more reliable and safe communication in dangerous areas.

What's more, PT580H UL913 has a good waterproof and dustproof, while supporting a variety of scheduling and management systems in addition with a good cost-effective project control to meet the economic needs of customers for upgrade.

Voice from Customer

"Explosion-proof hand-held radios Hytara PT580H (UL913) well functions in the existing radio communication system, thus ensuring a reliable and fully-featured daily communication for us."
