TETRA Terminal Interoperability Certificate

January 2003

THALES

Manufacturer	Terminal	Software/Hardware Release No.	Dates of testing
THALES	Vector PRM 5202A	HW: ISSUE 1 SW: AlgPkgTea2, Red DSP, tsm:3.11.0 Controll Target Black DSP: 3.11.1 TAA : Unknown	27-28 January 2003

ISCTI (Istituto Superiore delle Comunicazioni e delle Tecnologie dell'Informazione) has witnessed that the THALES Terminal is operating in accordance with:

TETRA Interoperability Profile:

PART 1 CORE: TTR 001-01 VER 3.0.13, JUNE 2001

TIP PART 10: E2EE WITH CVO TTR 001-10 VER 1.0.1, DECEMBER 2001

TIP PART 2 SDS: TTR 001-02 VER 1.0.1, AUGUST 2001

The test results for the tested features can be found in the tables of this certificate.

Authorised IOP test engineer

Information about the equipment used for testing

Testing during the January 2003 IOP Test Session:

The tests were performed using the following SwMI:

Manufacturer	Infrastructure	Software/Hardware Release No.
Nokia	NTS 3.0	HW: DXT256 (exchange) SW: w3 6.7-1 HW: TBS400 (base station) SW: TBC 6.47-0, TBBM 3.43-0

ISCTI has made every effort to ensure that tests have been made correctly, and in accordance with the relevant TIPS. ISCTI has no liability for the test results, or towards the manufacturers.

Additional information about the test performed

The tests were performed in the 380-400 MHz band. The SwMI was operating with the following configuration:

MCC	346
MNC	5
Colour code	35 - 40
LA1 carrier frequency (BS Tx)	395.1875 MHz
LA2 carrier frequency (BS Tx)	395.4125 MHz
PSTN gateway	16777184 (FFFFE0)
Subscriber classes	FFFF ₁₆

Test Results

The test results are shown in the tables below.

Test results and the certificates from previous IOP test session are available on TETRA MoU web site (<http://www.tetramou.com/interoperability>).

Tables indicate whether or not tests addressing a specific requirement of the TIP specification have been performed, whether or not the requirement is applicable for the SwMI, and the result of the test if executed. Each entry of the table may take one of seven values:

- : No test performed.
- N/A: Not applicable for the SwMI
- NTPA: No Test Plan/case Available
- No : Not supported by Terminal
- P : Pass
- F : Fail
- I : Inconclusive

No test performed (-) is assigned in case of no test case performed during the IOP session.

The test results have been derived from examining the behaviour of a live system. The verdicts indicated are based on the log evaluation of the information exchange between the SwMI and the terminals indicated in the following tables. The verdicts reflect the fact that at the time of the IOP testing it was/was not possible to demonstrate a behaviour that was in accordance with the related requirement.

ISCTI has made every effort to ensure that tests have been made correctly, and in accordance with the relevant TIPs. ISCTI has no liability for the test results, or towards the manufacturers.
