DMO TETRA Interoperability Certificate

Teltronic, MDT-400, DM Terminal

Brussels, April 2010

Latest Certified DM Terminal SW Release:	V20
Latest Certified DM Terminal HW Release:	CCP 00.09

ISCTI (Istituto Superiore delle Comunicazioni e delle Tecnologie dell'Informazione) certifies that the Teltronic MDT400 DM Terminal has been subject to interoperability testing for the features listed in the "Certified features" tables of of this certificate with the following DM Terminals Teltronic MDT-400, Sepura STP8000, Sepura SRG3900, EADS THR9, Motorola MTP850s, Motorola MTP850s Motorola TCR1000, Cleartone CM5000, Cleartone, HTT500, in accordance with the TETRA Interoperability Profiles, TIP compliance Test Plan and related TETRA interoperability requirement tables.

The certificate features associated to each DM terminal are shown in the "Certificate features" tables.

The table lists all the available TETRA interoperability profiles, and summarizes the main functionalities of every profile according to the TETRA interoperability requirement tables.

A feature is **"Certified"** when it has been successfully tested during the last test session with one of the testing method described in the TETRA process document part 1 (TPD001).

A breakdown into the feature details is given in the Feature Compliance Overview section of this certificate.

Detailed test results and explanation about the procedure used to provide verdicts are listed in the Test Report associated to this Certificate.

Feature Compliance Overview

The "Certified features" tables of this certificate provide an indication about the main interoperable TETRA features for each TIP specification (as described in the TIC-RT). The main interoperable TETRA features results depend on a set of sub-feature, the verdicts associated to each sub-feature are directly derived from the analysis of the performed test cases.

The results associated to each feature and sub-feature are shown in the "Feature compliance report" table below. The certified DM Terminal is highlighted in light blue. The main features are indicated with grey background and the associated sub-features (or second level features) have white background.

The verdict assigned to a sub-feature as showed in the "Certified features" tables is derived by the Feature compliance report tables.

Verdict	Definition
Certified	All required tests have been performed and passed.
Partial	Not all the required test cases have been performed, but none have failed.
-	Feature cannot be certified e.g. it is not supported by at least one product, no tests were performed, or some tests were performed but at least one failed.

The verdict assigned to a sub-feature is the result of the analysis of the test case results listed in the Test Report. The verdict assigned to each sub-feature is derived from one or several test case results or test steps result, the TETRA Interoperability requirement tables (TIC-RTs) indicate the link between sub-features and test cases for the certified set of equipment capabilities (see Test Report).

Verdict	Definition
Passed	All mandated tests or steps of tests linked to this functionality (as per TIC-RT indication) are compliant with the TIP specification relevant to this feature.
Time_limited	Not all Mandated tests (as per TIC-RT indication) have been executed (ran out of time)
Failed	At least one of the required test cases has failed.
No_Equipment	At least one of the required test cases has not been executed due to unavailability of a needed equipment.

The verdict associated to the feature gives also indication about the method used to test that feature. The allowed testing Methods are listed in the table below, a complete description of the procedures and constraints associated to each of them can be found in the "TPD001 TETRA Interoperability Certification Process Description" document.

Testing Method	Description
Complete	All mandated tests associated to the feature have been executed.
Spot	Only a selection of the mandatory test cases associated to the feature has been executed during the test session. These tests are a subset of the tests performed on an equivalent software which has been "completely" tested against the same functionality on a different equipment, see manufacturer declaration in annex B.
Regression	Only a selection of the mandatory the test cases associated to the feature is executed during the test session. These tests are a subset of the tests performed on a previous version of the same software which has been complete tested in a previous test session against the same functionality, see manufacturer declaration in annex B.
Regression on spot	The regression method has been applied on the verdicts based on the spot testing method.

X_pass_of_Y	Y test cases were required and X were passed.

Depending on equipment capabilities declared by the manufacturer, some features or sub-feature cannot be tested. The following table describes meaning of the used abbreviation:

Indication	Definition
Not supported	At least one MS do not support the minimum features required to verify these items

ISCTI has made every effort to ensure that every result have been correctly evaluated in accordance with the relevant TIPs, Test Plans and TIC-RTs. ISCTI has no liability for the test results, or towards the manufacturers.

The table on the following page lists HW and SW releases of DM Terminals under test in the test session and the used TIP specifications, Test Plans, and TIC-RTs.

This Certificate and Certificates from previous test sessions are available on the TETRA Association web site

(http://www.tetra-association.com/tetramou.aspx?&id=2636).

The feature results are shown in the tables below.

Information on equipment under test and document references

Test Session Place/Date	Brussels, April 2010
DM Terminal Type	Teltronic MDT-400
DM Terminal HW release	CCP 00.09
DM Terminal SW release	V20
DM Terminal 1 Type	Sepura STP8000
DM Terminal 1 HW release	PSNTW201T300P0001
DM Terminal 1 SW release	166700802937
DM Terminal 2 Type	Sepura SRG3900
DM Terminal 2 HW release	MSUTW201T2C0G00
DM Terminal 2 SW release	166700803577
DM Terminal 3 Type	EADS THR9
DM Terminal 3 HW release	RC-20
DM Terminal 3 SW release	6.53-4
DM Terminal 4 Type	Motorola MTP850s
DM Terminal 4 HW release	PT912BS
DM Terminal 4 SW release	MR5.11
DM Terminal 5 Type	Motorola MTP850
DM Terminal 5 HW release	PT911B
DM Terminal 5 SW release	MR5.11.1
DM Terminal 6 Type	Motorola TCR1000
DM Terminal 6 HW release	PT919S
DM Terminal 6 SW release	MR9.6.3
DM Terminal 7 Type	Cleartone CM5000
DM Terminal 7 HW release	1.0
DM Terminal 7 SW release	MR01.XXX.036
DM Terminal 8 Type	Teltronic HTT500
DM Terminal 8 HW release	CCP 00.03
DM Terminal 8 SW release	V07

Annex A

List of Revisions of the Certificate

Date	Ver.	Modification
09.08.2010	1	First published version
18.11.2010	2	updating: the certificate has been changed according to CR 323. In particular, tests 2.1.1 and 3.1.9 have been removed.
